

# RENAL CAREPARTNERS

## Providing In-Center and Home Dialysis Services

The goal of **RENAL CAREPARTNERS** is to continuously improve the delivery of care and services to individuals who require dialysis to sustain life.

**RCP** believes that this delivery of care must extend beyond clinical care. A high level of professionalism must exist throughout the facility, extending to the physical plant, the staff, and the company.

**RCP** also believes that our clinical personnel can best identify and implement opportunities for quality improvements in patient care.

To further identify opportunities for improvement, our clinic will implement software based initiatives to monitor trends in meaningful indicators of care and compare outcomes to regional and national benchmarks.

Continuous Quality Improvement (CQI) tools and techniques are employed to identify and enhance the system for delivery of dialysis care on an on-going basis.

**RCP** provides specialized programs dealing with complications and co-morbidities of the ESRD patient.

We are dedicated to improving outcomes and lowering mortality rates through specialized programs such as pre-ESRD management, diabetes education and vascular access monitoring.

All of our facilities provide the following:

- ✓ Individual flat screen TV's and wireless internet
- ✓ Serene and tranquil environment
- ✓ Easy and ample parking
- ✓ Convenient location
- ✓ Diversity of patients and staff
